# Introduction

26 year old Phillip Scifleet has had, to date, a remarkable racing career and is keen to progress through the ranks of Australian motor racing. Phillip won the 1998 British F3 Championship with no less than 10 wins from twelve starts and by an impressive 140 point margin - evidence of remarkable talent.

Like many young drivers, Phillip began his career Karting, competing in five international Championships and numerous National and State Titles between 1991 and 1994. In 1995 he graduated to the Khumo/Suzuki GTI Cup where he secured a number of podium finishes and a tremendous race win in the Bathurst 1000.

Australia continued to provide the proving ground for Phillip as he progressed rapidly into Formula Fords winning the 1996 NSW Championship then securing a credible third overall in the 1997 Quantas Australian Grand Prix.

He broke the lap record at Sandown in the Tickford 500, which he still holds and qualified under the lap record at the Bathurst 1000.

An impressive performance in the inaugural Elf Formula

Campus challenge at the 1997 Macau GP, good PR support and excellent TV coverage meant it was no surprise that news of his achievements filtered across the world, where Phillip was offered testing opportunities with several UK teams.

After evaluating the competitiveness of Formula Opel, Formula Renault, Formula Audi and Formula 3, a rigorous winter testing program ensued; resulting in many offers from competitive drives. The decision was made to compete in the most challenging formula and Phillip promptly signed with Ray Rowan to make his assault on the 1998 British F3 Championship.

Team manager Ray Rowan's faith in Phillip was soon justified as he tore to a commanding victory in the first race at Donington Park - a feat he was to repeat a further nine times during the course of the season. Phillip broke the lap record twice at Brands Hatch and equaled the lap record at almost every other circuit.

Very rarely does a driver win a Championship at this level by such a commanding margin and Phillip Scifleet's performance gives every indication he can do it again in any category he wishes to pursue.
